

VisuNet HMI Workstations and Components

Pepperl+Fuchs sealed life science HMIs are specifically designed and optimized for use in regulated areas and throughout the pharmaceutical and fine chemicals industries: from hazardous area process and batch control to hygienic cleanroom applications. They can be supplied as standalone solutions or as panel-mount units. The attention to detail, materials selected, design of the surface, finish and architecture of the overall system impede the accumulation of fluids, dirt and bacteria. The mechanical components are extremely easy to inspect, maintain, service and clean.
