

# Precision Digital Large Display Process Meter

The PD650, PD655 and PD656 are Large Display Process Meters with flow rate, totalizer and batch control capabilities. Each accepts the common process signals such as 4-20 mA, 0-5 VDC, 1-5 VDC and 0-10 VDC and displays these signals in engineering units on a large, high efficiency,  $4\frac{1}{2}$  digit red LED display. All units also provide two isolated 24 V power supplies to drive both the input and output loops.
